RIFLE RATED ACTIVE SHOOTER KITS

The ATS Armor difference begins with our NIJ 0101.06 certified, multi-shot stopping capability, to defeat high powered, rapid fire threats. We use the most advanced ballistic materials and technologies to produce stand-alone, hard armor plates that are lighter, stronger and safer. Our plates provide edge-to-edge protection, along with a patented, ergonomic QuadCurve fit for additional safety and comfort. Our plate carriers feature quick adjust cinch and buckles, PALS webbing system, padded interior lining, color options and they're available in two or four plate configurations.

III
